## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a method of early identification of germline transformed plants comprising transforming tissue with at least one nucleic acid sequence encoding a protein to obtain transformed plant tissue, classified in class 800 subclass 278, for example.
- II. Claims 20-21, drawn to a method of early identification of germline transformed plants comprising transforming tissue with at least one nucleic acid sequence encoding an antisense gene to obtain transformed plant tissue, classified in class 800 subclass 286, for example.

2. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to sense expression of heterologous nucleic acid as opposed to antisense expression. Sense and antisense operate by different mechanisms and have different effects—sense expression of nucleic acid increases expression whereas antisense expression of nucleic acids down regulates expression.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the literature and sequence searches required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

Art Unit: 1638

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
